

Supplier Onboarding and Due Diligence Policy

Policy ID	PROC-001
Version	3.2
Effective date	01 June 2026
Owner	Procurement and Finance Governance
Approved by	Chief Financial Officer

1. Purpose

This policy defines the minimum checks required before a supplier may be created or activated in the vendor master.

2. Required documents

A domestic supplier must provide a completed onboarding form, current tax registration evidence, bank account confirmation, and relevant insurance where the category creates operational or professional exposure. Suppliers with access to company data must also complete the information security questionnaire and provide contractual data-processing terms where required.

3. Duplicate screening

The onboarding process must search the vendor master using legal name, trading name, tax identification number, registration number, bank account, address, telephone, and email domain. An exact tax identification number or bank account match is a high-confidence duplicate indicator and must be referred to Vendor Master Control.

4. Banking controls

The beneficiary name should correspond to the legal supplier name. A mismatch, third-party account, or bank-country mismatch requires independent verification and approval by Treasury. Bank details must not be created or changed solely from an invoice or email instruction.

5. Risk and sanctions checks

The supplier, beneficial owners, and relevant directors must be screened before activation. A failed or unavailable check must not be treated as a pass. The case must remain pending or be escalated according to risk severity.

6. Cross-border and data access

Cross-border suppliers, foreign bank accounts, and suppliers with administrative or data access require enhanced review. Legal and Information Security approval is required when personal, financial, or confidential company data is processed outside approved locations.

7. Spend-based approvals

Estimated annual spend up to LKR 1,000,000 requires procurement approval. Spend above LKR 1,000,000 and up to LKR 5,000,000 also requires the relevant budget owner. Spend above LKR 5,000,000 requires Procurement Director and Finance Controller approval.

8. Human approval

Vendor creation, duplicate resolution, bank-detail acceptance, risk override, and rejection of a supplier are controlled decisions and require an authorised human reviewer.

9. Record keeping

The case record must retain submitted documents, extracted fields, verification results, policy evidence, reviewer comments, approvals, and downstream system responses.
